

Blind Intersection Protection: The **IQSensor** requires no power source. Passing in front of **IQSensor** will activate the signaling safety light and warn of incoming traffic using Ergomat's proprietary technology.

BENEFITS

NO POWER DROPS: Ready to use immediately after installation. Battery powered, no power drops needed.

EASY INSTALLATION: Entire system installs in minutes with no extra hardware needed.

IQSensor & Signaling Safety System

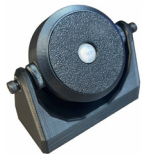

Includes: **IQSensor** available as a directional sensor or as a motion sensor. Directional sensor will sense traffic coming from a user specified direction.

Available Options: Safety Sign in 12" or 24". Safety Light or Large Safety Light.
